HMI Display

For unlimited industrial applications.

Innovative design. Maximum performance. Minimal space.

The CANEO series5x Display is the ideal HMI solution for any environment: compact, bright, and easy to use.

Multicolor LEDs clearly indicate operating status, visible even from long distances. The intuitive interface only focuses on functions your operator really needs.

Perfect for production lines, machinery control, or logistics. Available in Single-, Duo-, or Multi-Touch versions for maximum flexibility.

Responsive touch operation – works reliably with or without gloves.

Rugged & durable: IK08 / IP69K certified for washdown and heavy-duty use.

IO-Link compatibility for seamless integration and effortless setup.

Excellent cost-to-performance ratio compared to standard HMI displays.
